

THE PRECISION OF
POWDER

Micronized collagen that maintains its native structure^{1,2}

MICRONIZED NATIVE COLLAGEN FOR DEEP, COMPLEX WOUNDS^{1,2}

Customizable consistency for optimal contact, conformity, and coverage¹

- The same original, native collagen structure as PuraPly AM^{1,2}
- Can be applied dry, or mixed with sterile solution to form a paste, enabling desired handling characteristics to access difficult wound locations¹
- Can help support a healing environment² by inhibiting excess MMPs,³ a known barrier to healing⁴
- Can be used adjunctly with PuraPly AM, which can help control bioburden as an antimicrobial barrier⁵

MMP=matrix metalloproteinases

COMPLEX SURGICAL WOUNDS COME IN ALL SHAPES AND SIZES.¹

PuraPly MZ is available in an array of sizes to better suit your needs.

Total Size (mg)	100	500	1000
Product Number	515-059	515-061	515-063
